

## Radio Frequency Homcloud SOS Panic button

### 1. Introduction

The Homcloud radio frequency SOS Panic Button allows you to request immediate help from home if necessary. Saved contact on Homcloud Alarm Panel will be contacted immediately.

### 2. Specifications

1. Emitting frequency: 433MHz
2. Emitting distance: 30-50 m
3. Programme code: 1527
4. Case material: ABS plastic
5. Battery type: CR2016x2 batteries

Homcloud code: WL-RFPB

Model n°: WL-12W

### 3. Description

- 1 SOS button, a buttonhole to pass a thread and keep it around the neck

### 4. Configurations

1. (recommended) For the complete configuration of the SOS panic button read the manual of the Homcloud Alarm Panel.

Check if battery of SOS button is charged. (press the button and see indicator led on)

Enter the App in the Homcloud Alarm Control Unit already configured and select the "Add Sensor-Detector" section, then subsequently press the button of the SOS panic button.

The LED light will flash again, a beep will sound (control unit) and the SOS button will appear on the App ready to be used.
